

Refrigeration Mechanic

Location: Annacis Island, Delta BC

TransCold Services Ltd. has been in business for over 60 years as a commercial/industrial refrigeration contractor. The company offers best-in-class commercial, industrial and marine refrigeration solutions. Headquartered in Annacis Island, Delta, BC, the company is proud to have the best government certified refrigeration and electrical professionals in their team.

We are currently looking for an experienced Refrigeration Mechanic to join our team. Duties and responsibilities are as follows:

- Diagnose, install, repair and service industrial, commercial refrigeration systems
- Versed in trouble shooting HVAC systems; Packaged units, MUA systems, steam / hydronic boilers and pumps
- Effectively communicate with customers, addressing mechanical deficiencies and solutions
- Understand the meaning of preventative maintenance and its' role to compliment service
- Refrigeration computer software literate
- Ensure work conforms to all municipal and utility codes and quality standards of the company

Required Skills and Qualifications

- Current Refrigeration Red Seal qualification, Gas B Ticket
- 3-5 years similar as Refrigeration Mechanic using general refrigeration
- On call rotation availability
- Ability to work independently and as part of a team
- Clean class 5 drivers' license / abstract
- Hand tools, cordless drills and vacuum gage supplied by mechanic.

To be considered for the above opportunity, we invite you to send an up-to-date resume to tcw.services@transcold.com or by clicking on the "Apply Now" button on www.transcoldservices.com/careers.

We thank all applicants for their interest; however only those selected for interview will be contacted.
